1. Background:

Load-shedding (instituted intermittently since 2008) and significant increases in bulk electricity costs over the last number of years have had a detrimental effect on both the Dawid Kruiper Municipality's economy and its consumers. This has resulted in the Dawid Kruiper Municipality committing to enhance energy security and reduce bulk electricity costs through the direct procurement of electricity. The Municipality has also a goal toward lowering carbon emissions.

In line with its energy security, cost curtailment and carbon neutral commitments, the Dawid Kruiper Municipality is seeking competitive proposals from potential independent power producers (IPP's) to purchase electricity from power generation plants that will be connected directly to the Municipality's electrical distribution network.

Successful bidders will be required to enter into 25-year land lease agreement and Power Purchase Agreement (PPA) with the Municipality. The intention is to lease a portion of Klipkraal land and to award a Power Purchase Agreements to the preferred IPP under this tender.

Tenderers should take note that any adjudication or award processes pursuant to this tender are contingent upon the necessary regulatory conditions being in place to make the generation and sale of energy in terms of the tender lawful and possible.

2. SCOPE OF WORK

The Municipality is seeking competitive proposals from potential independent power producers for power generation projects connected to the Municipality's electrical distribution network.

This tender will follow a 2 stage process. For the first stage, tenders will be required to submit technical proposals that meet the specified eligibility requirements. A tenderer is required to submit one proposal per stage to be evaluated. Successful proposals, evaluated as having met the eligibility requirements, will be awarded preferred bidder status and may progress to the second stage.

During the second stage, tenderers will be invited to submit a financial and detailed technical proposal, at which time; network connection pricing will be determined by the Municipality's Electrical Services department alongside Finance department and then communicated to qualifying bidders. The qualifying bidders will consider this in their bid and submit a final bid price for evaluation.

All successful bidders, after final evaluation, will be required to conclude a 25-year land lease and Power Purchase Agreement (PPA) with Dawid Kruiper Municipality.

2.1 FUNCTIONAL REQUIREMENTS

Each proposal needs to confirm, demonstrate and quantify that it meets the following functional requirements:

- (a) Each proposal may consist of a number of component power generation plants that may use multiple technologies and may be located at Klipkraal land. Component plant(s) owned by the Dawid Kruiper Municipality or any other municipality may not be included and will result in bid rejection.
- (b) Component plants may be included in more than one project proposal. In such a case, only one proposal can be successful in the second stage.
- (c) Every component power generation plant **must** connect directly to the Municipality's network and no wheeled energy from generators connected to grids other than the Municipality's grid will be purchased.
- (d) The successful bidders must finance all aspects of each project proposal including:
- Obtaining of landuse rights
 - Obtaining permission from the minister of energy to purchase electricity
 - design,
 - procurement,
 - construction,
 - grid connection,
 - commissioning,
 - operation, maintenance and decommissioning as appropriate for each of the proposed plant.
- (e) The power generation project must enhance energy security and details of annual supply characteristics (energy, capacity, time of supply, dispatch-ability) must be provided for each component plant. Refer to Schedule 1 of the attached PPA.
- (f) The power generation project proposal must contribute to reduced carbon emissions and the total combined CO₂/kWh of energy supplied must be specified.

The types of low carbon generation technologies that will be considered, inter alia:

- Solar PV
- Organic Waste to energy
- Battery Energy Storage Solutions (BESS)
- Any of the above combined with storage

Any project that requires a fuel / feedstock agreement with another Municipality department (waste water, solid waste etc.) will not be considered and is explicitly excluded from this tender.

Innovative technologies will also be considered. However, the proposed generation methodology must have been successfully implemented at utility scale, either locally or internationally, with an operational track record in the last 5 years. Technologies that have not been successfully implemented in the last 5 years and without a proven track record will not be considered in this bid and will result in bid rejection. Proof of operation must be provided in the tender proposal submissions. Refer to Schedule 15.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
